Craven County Confirmed COVID-19 Cases Current as of 05/22/20, 11:30 am

Craven County has 168 confirmed COVID-19 cases as of 11:30 a.m. on May 22, 2020. Out of the 168 confirmed positive cases, 45 of those individuals have recovered, are doing well, and are out of isolation. The recovered cases completed the necessary isolation requirement and have been free of COVID-19 symptoms for at least 72 hours. Of the 168 cases, seven have been related to out of state travel, 26 are from community transmission, and 135 are a direct contact with a previously confirmed positive. There have been four deaths related to COVID-19. Four of the active COVID-19 cases are currently hospitalized.

Over the past seven days there has been a significant increase in the number of COVID-19 cases in Craven County. With the exception of two cases, all of the most recent cases are due to direct contact with a previously confirmed positive case. These newest COVID-19 cases are isolated to a segment of friends, family members, and co-workers.

Total Confirmed Cases Craven County	Active Cases Craven County	Recovered Craven County	Deaths Craven County	Currently Hospitalized Craven County
168	119	45	4	4

It is important to recognize there are many people with COVID-19 who will not be included in daily counts of laboratory-confirmed cases, including:

- People who had minimal or no symptoms and were not tested.
- People who had symptoms but did not seek medical care.
- People who sought medical care but were not tested.
- People with COVID-19 in whom the virus was not detected by testing.

The number of laboratory-confirmed cases will increasingly provide a limited picture of the spread of infections in Craven County as COVID-19 becomes more widespread and the number of infected people who are not included in the daily counts of laboratory-confirmed cases increases.

Craven County COVID-19 Cases by Age, Gender, Death Rate, and Mode of Transmission

AGE	0-17	18-24	25-49	50-64	65+
Percent of Total Cases	16%	11%	42%	21%	10%

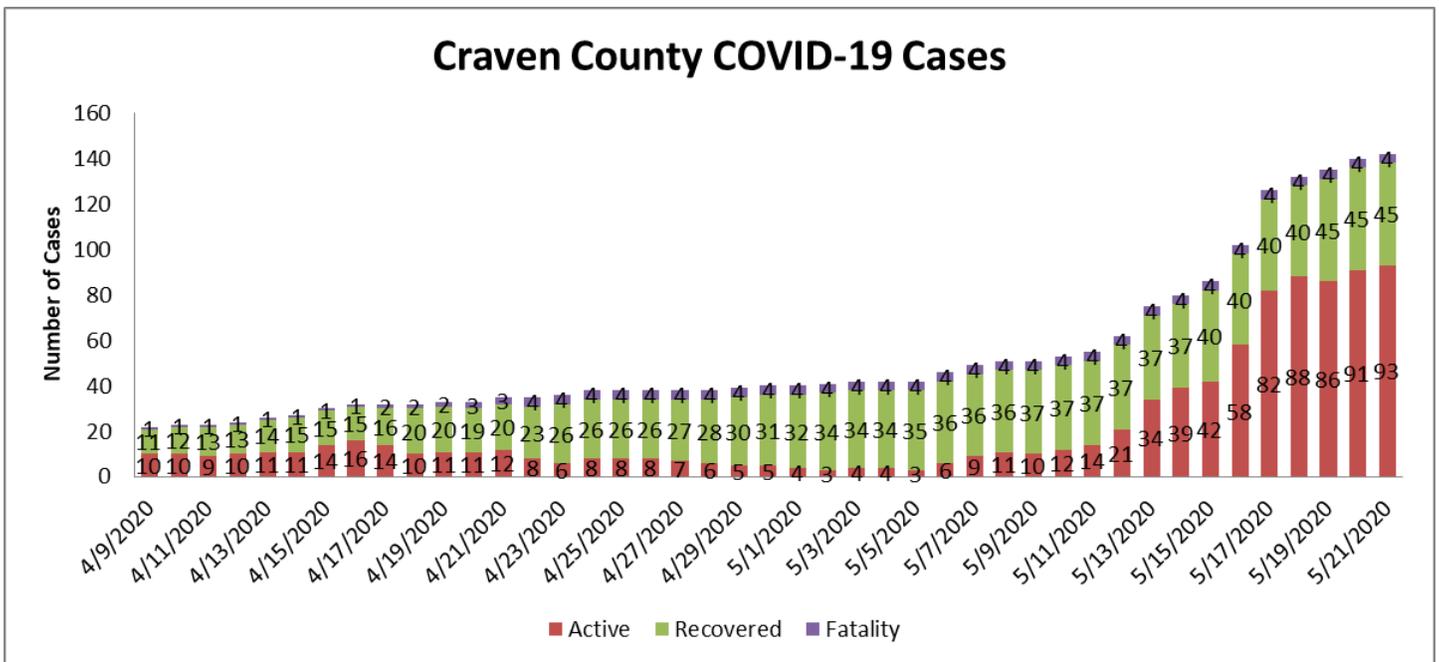

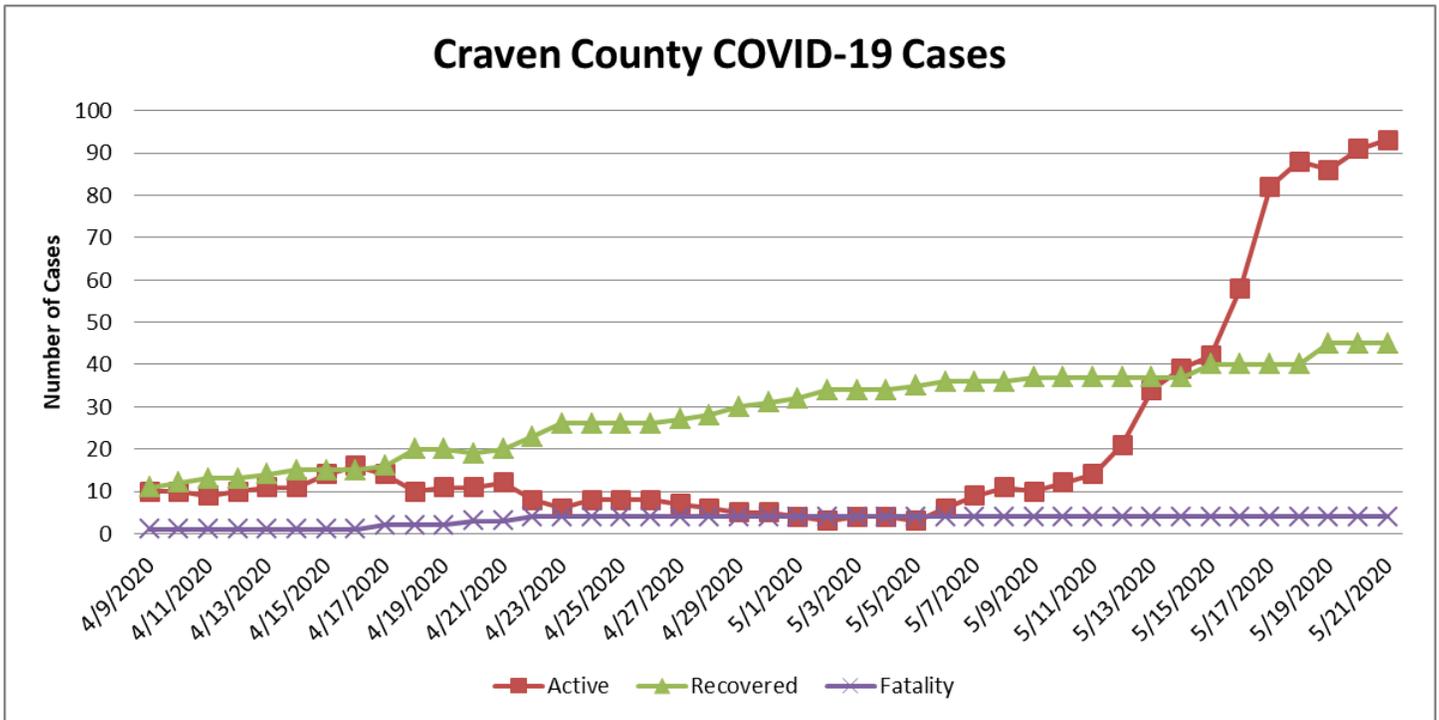

GENDER	Male	Female
Percent of Total Cases	57%	43%

DEATH RATE	North Carolina	Craven County
Per 100,000	6.94	3.92

MODE OF TRANSMISSION	Travel	Community Transmission	Direct Contact
Percent of Total Cases	4%	15%	80%

*Rates are calculated using population estimates from the US Census Bureau

When using the NCDHHS COVID-19 site to stay up to date, please keep in mind that county case numbers may change once residency is verified. Therefore, the total number on the county map may differ from the number of Craven County Cases.

*Charts contain data collected up to May 21, 2020.

Note: As you review the data, please be aware this data is preliminary and may change as cases are investigated. Percentages may not sum to 100% due to rounding. Also, the data is representative of the confirmed cases, not of all COVID-19 cases in Craven County.
