Craven County Confirmed COVID-19 Cases Current as of 07/30/20, 11:00 am

Craven County has 641 confirmed COVID-19 cases as of 11:00 a.m. on July 30, 2020. Out of the 641 confirmed positive cases, 506 of those individuals have recovered, are doing well, and are out of isolation. The recovered cases completed the necessary isolation requirement and have been free of COVID-19 symptoms for at least 72 hours. Of the 641 cases, 12 have been related to out of state travel, 137 are from community transmission, 457 are a direct contact with a previously confirmed positive case, and 35 are still being investigated. There have been ten deaths related to COVID-19. Eight of the active COVID-19 cases are currently hospitalized.

A tenth Craven County resident died from complications related to the Novel Coronavirus (COVID-19) on July 29, 2020. The individual was tested for COVID-19 on July 10, 2020 and resulted positive on July 13, 2020. The death was reported to the Craven County Health Department on July 30, 2020. The individual had several underlying health conditions. To protect the family's privacy, no further information about the individual will be released.

Craven County citizens are encouraged to use reputable sources of information to learn more about COVID-19 cases in Craven County and North Carolina. Reputable sources of information include the Craven County Health Department and NC Department of Health and Human Services (NCDHHS) websites.

Total Confirmed Cases Craven County	Active Cases Craven County	Recovered Craven County	Deaths Craven County	Currently Hospitalized Craven County *of active cases
641	125	506	10	8

The Craven County Health Department works with state, commercial, and private labs to track the number of confirmed positive COVID-19 cases in Craven County. Health care providers determine which lab they send their COVID-19 tests to. There are multiple hospital and commercial labs that conduct COVID-19 tests. These labs manage their own supplies and operate independently from the Department of Health and Human Services and the North Carolina State Laboratory of Public Health.

Craven County will continue to track and post the number of laboratory-confirmed COVID-19 cases; however, it is important to recognize there are many people with COVID-19 who will not be included in daily counts of laboratory-confirmed cases, including:

- People who had minimal or no symptoms and were not tested.
- People who had symptoms but did not seek medical care.
- People who sought medical care but were not tested.
- People with COVID-19 in whom the virus was not detected by testing.

The number of laboratory-confirmed cases will increasingly provide a limited picture of the spread of infections in Craven County as COVID-19 becomes more widespread and the number of infected people who are not included in the daily counts of laboratory-confirmed cases increases.
