Craven County Confirmed COVID-19 Cases Current as of 10/27/20, 11:00 am

Craven County has 2,249 confirmed COVID-19 cases as of 11:00 a.m. on October 27, 2020. Out of the 2,249 confirmed positive cases, 2,017 of those individuals have recovered, are doing well, and are out of isolation. The recovered cases completed the necessary isolation requirement and have been free of COVID-19 symptoms for at least 24 hours. Of the 2,249 cases, 25 have been related to out of state travel, 456 are from community transmission, 1,490 are a direct contact with a previously confirmed positive case, 86 are still being investigated, and 192 are unknown. There have been 60 deaths related to COVID-19. Nineteen of the active COVID-19 cases are currently hospitalized.

Craven County citizens are encouraged to use reputable sources of information to learn more about COVID-19 cases in Craven County and North Carolina. Reputable sources of information include the Craven County Health Department and NC Department of Health and Human Services (NCDHHS) websites.

Total Confirmed Cases Craven County	Active Cases Craven County	Recovered Craven County	Deaths Craven County	Currently Hospitalized Craven County *of active cases
2,249	172	2,017	60	19

The Craven County Health Department works with state, commercial, and private labs to track the number of confirmed positive COVID-19 cases in Craven County. Health care providers determine which lab they send their COVID-19 tests to.

Craven County will continue to track and post the number of laboratory-confirmed COVID-19 cases; however, it is important to recognize there are many people with COVID-19 who will not be included in daily counts of laboratory-confirmed cases, including:

- People who had minimal or no symptoms and were not tested.
- People who had symptoms but did not seek medical care.
- People who sought medical care but were not tested.
- People with COVID-19 in whom the virus was not detected by testing.

The number of laboratory-confirmed cases will increasingly provide a limited picture of the spread of infections in Craven County as COVID-19 becomes more widespread and the number of infected people who are not included in the daily counts of laboratory-confirmed cases increases.
