Replacement Vehicles

LoNo: "A low or no emission bus is defined as a passenger vehicle used to provide public transportation that sufficiently reduces energy consumption or harmful emissions, including direct carbon emissions, when compared to a standard vehicle. The statutory definition includes zero emission transit buses, which are defined as buses that produce no direct carbon emissions and no particulate matter emissions under any and all possible operational modes and conditions. Examples of zero emission bus technologies include, but are not limited to, hydrogen fuel-cell buses, battery-electric buses, and rubber tire trolley buses powered by overhead catenaries."
